DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Adrian Lee on 09/22/05

The application has been amended as follows:

Claims 29-30 and 47-48 have been cancelled.

Allowable Subject Matter

2. Claims 21-26 and 41-46 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent claims 21 and 41, the claims have been amended to overcome the prior art (Nakamura et al. US 6,463,284). The prior arts fail to disclose when the switching station receives the location registration signal from the mobile station and the switching station registers in the second management unit the subscriber location information about the mobile station registered in the first management unit for use with the switching station, as argued by Applicants on pages 16-17.

Claims 22 and 42 depend on claim 21. Therefore, it is allowed.

Art Unit: 2681

Regarding independent claims 23 and 43, the claims have been amended to overcome the prior art (Nakamura et al. US 6,463,284). The prior art fails to disclose a process in which a call origination signal is received as argued by applicants on pages 12-13.

Claims 24 and 44 depend on claim 23. Therefore, they are allowed.

Regarding independent claims 25 and 45, the claims have been amended to overcome the prior art (Nakamura et al. US 6,463,284). The prior art fails to disclose a process in which a call termination signal is received as argued by applicants on pages 13-14.

Claims 26-46 depend on claims 25 and 45. Therefore, they are allowed.
